code:

```
import java.util.Scanner;
```

```
public class StudentAnalyzerKarim {
```

```
    public static String category(int age) { // process
```

```
        if (age ≥ 0 && age ≤ 12) {
```

```
            return "Child";
```

```
        } else if (age ≥ 13 && age ≤ 19) {
```

```
            return "Teenager";
```

```
        } else if (age ≥ 20 && age ≤ 59) {
```

```
            return "Adult";
```

```
        } else if (age ≥ 60 && age ≤ 150) { // added a limit
```

```
            return "Senior Citizen";
```

```
        } else {
```

```
            return "Invalid age input";
```

```
        }
```

```
    }
```

```
    public static void main (String[] args) {
```

```
        Scanner input = new Scanner (System.in);
```

```
        String name;
```

```
        int age;
```

```
        System.out.println("==== Student Age Analyzer ====");
```

→ next page

```
System.out.println("Enter Student Name: ");    //input
```

```
name = input.nextLine();
```

```
//validation : letters only for name
```

```
if (!name.matches("[a-zA-Z]+")) {
```

```
    System.out.println("Invalid name input");
```

```
    return;
```

```
}
```

```
System.out.println("Enter Age: ");
```

```
//input
```

```
//validation : only accept integers
```

```
if (!input.hasNextInt()) {
```

```
    System.out.println("Invalid age input");
```

```
    return;
```

```
}
```

```
age = input.nextInt();
```

```
String category = category(age);
```

```
//process
```

```
System.out.println("In ==== Result ====");    //output
```

```
if (category.equals("Invalid age Input")) {
```

```
    System.out.println("Invalid age input");
```

```
} else {
```

```
//output for all valid inputs
```

```
    System.out.println("Student Name: " + name);
```

```
    System.out.println("Age: " + age);
```

```
    System.out.println("Category: " + category);
```

```
}
```

```
input.close();
```

```
}
```

```
}
```

Sample Output:

① ===== Student Age Analyzer =====

Enter Student Name: 67

Invalid name input

② ===== Student Age Analyzer =====

Enter Student Name: Denisse

Enter Age: 1000

===== Result =====

Invalid age input

③ ===== Student Age Analyzer =====

Enter Student Name: Denisse

Enter Age: 20

===== Result =====

student Name: Denisse

Age: 20

category: Adult
